

ENERGY POLICY STATEMENT

M+W Zander FE UK Ltd aim to save and conserve energy and reduce energy costs to the maximum extent possible by:

- Designing and developing energy efficient systems
- Assisting facility users to improve the performance of all systems and all subsequent support equipment
- Training and communication to promote good housekeeping and energy management
- Monitoring and tracking of energy usage for the provision of benchmarking and setting of targets
- Participating and committing to Internal and Client driven energy campaigns to achieve energy efficiencies
- Investing in clean, energy efficient technologies

The Company goal is to reduce environmental impacts on all our operational sites as far as practically consistent with the operational needs of our clients
